1 Whitmore project here

## WE RISE TO THE CHALLENGE WHEN THROWN A CURVE WALL

**A new addition to the Wellington skyline, One Whitmore incorporates curved and double curved double-glazed units integrated into curved pressure equalised unitised panels.**

Thermosash's solution on this project was specified to not only meet the Architect's intent and create a streamlined profile to manage Wellington's notoriously strong winds, but to streamline the installation process itself. Our façades are prefabricated in a controlled factory environment, each unit checked for quality and consistency before delivery to site. Our engineered façade solutions speed up your enclosure programme, saving you time, and reducing your risk - it just makes more sense.

**Locally innovating, testing, manufacturing and installing façade systems since 1973.**
