BUILDING ENVELOPE SOLUTIONS™

Lotu - Façade Installation Team Leader

## TRUE SUSTAINABILITY IS ALL ABOUT PEOPLE...

When we talk about sustainable business, we're talking about relationships. Relationships built on investment in our people and our passion for New Zealand's commercial manufacturing industry.

We are proud of our achievements over the last 42 years, supplying dependable Building Envelope Solutions™ to the New Zealand construction industry, and

our contribution to the city skylines of New Zealand, helping design and build the places we are born, live work, play and grow.

Designers and construction companies choose us for our innovation and personnel expertise in a country fraught with wind, rain and the occasional earthquake; and keep returning for the knowledge our team provides.

We believe every project represents a responsibility and legacy well in to the future - and we'll be around to honour them.

Now that's sustainable construction.
