

Dark Sky Project, Lake Tekapo – Sheppard & Rout Architects / Cook Brothers Construction / Woods Glass

TELESCOPES PROVIDE A WINDOW TO OUR UNIVERSE... SO DO WE.

The Dark Sky Project, located in the largest dark sky reserve in the world, aims to connect visitors to the night sky. Fitting then, that our window suites and high-performance glass solutions let you experience the panorama, all whilst having a cup of coffee.

Our range of unitised curtainwall, window and door suites are designed and manufactured in, and for the New Zealand environment. Large expanses of high-performance glass connect people with the natural world, whilst our bespoke design and engineering provide thermally improved solutions – increased weathertightness, integrated seismic design and faster installation.

Specify Thermosash – we believe it simply makes buildings better.
