WE GIVE COUNSEL ON HIGH PERFORMANCE FACADES

A high-performance façade system is demanded when providing a comprehensive total clad solution for a building that has Auckland City Council as its primary tenant. Thermosash's low embodied-carbon aluminium combined with our super airtight PW1000 unitised façade ensures a comfortable indoor environment and delivers a durable, low-maintenance exterior. The facade system is 5 Star Greenstar Design & As-Built rated and NABERSNZ rated - classifications that meet the needs of human and governing bodies!

Select a façade contractor for your next project that will engineer the specific façade and glass solution to meet your vision. Specify the Thermosash range of Unitised™ curtainwall, commercial windows, shop fronts, sliding doors, bespoke external elements and seamless integration of seismic design. We believe it makes buildings better, speeds up your enclosure programme, saves you time, and reduces your risk.

Locally engineering, testing, manufacturing and installing façade systems since 1973.
