FORGED IN METTLE

University of Auckland's state-of-the-art Recreation and Wellness Centre, Hiwa, delivers an array of world-class facilities over eight stories. Enclosed within a Thermosash unitised glazed aluminium curtainwall with integrated architecturally folded stainless steel sheet and solar shades. The system delivers a shining example for the campus while contributing to the durability and longevity of the building. The true test of its mettle!

Select a façade contractor for your next reclad project that will engineer a specific façade and glass solution to meet your vision and sustainability goals. We believe a Thermosash façade solution makes your building better, speeds up your enclosure programme, saves you time and reduces your risk.

Locally engineering, testing, manufacturing and installing façade systems since 1973.
