## OUR FAÇADE SOLUTIONS ARE ANYTHING BUT CONVENTIONAL.

Why settle for conventional when you can have it all - proven seismic and thermal performance, market leading weathertightness, faster installation, certified low carbon aluminium, and equally important, a solution designed and built around your vision rather than its limitations.

For nearly 50 years, Thermosash has specifically engineered your concepts into buildings of excellence. When you are ready to design your building, specify the Thermosash range of Unitised™ curtainwall, commercial windows, shop fronts, sliding doors, and bespoke external elements. We believe it makes buildings better, saves you time, and reduces your risk - it just makes more sense.

**We've been locally engineering, testing, manufacturing, and installing 'the occasional conventional' façade system - all since 1973.**
