

FAÇADE STRUCTURAL ENGINEER

The position will be based at our Auckland Office.

To outline your responsibilities: -

As a Façade Structural Engineer you will be involved in the design and engineering of our façade systems; analysing the structural integrity of our façade systems, preparing calculations, performance parameters for laboratory testing of our façades, temporary access solutions and also material handling crates specifications to ensure the behaviour and durability of materials used in their construction, and assist/supervise, QA/QC factory/site checks of our façades during manufacture and installation.

1. Prepare formal calculations for PS1 Design submission, analysing structural systems for both static and dynamic loads.
2. Ensure our façade systems are designed to specification - designing structures to ensure they do not collapse, bend, twist or vibrate in undesirable ways with particular attention to seismic tolerances.
3. Check working drawings of our windows/curtainwalls/façades as required. Check glass/aluminium engineering/structural silicone joint design/facade system design solutions etc.
4. Any other duties requested by the employer from time to time.
