## ANZAC RECLAD IS A BREATH OF FRESH AIR

The Thermosash PW1000 high-performance unitised curtain wall was selected for its seamless integration with our high-performance sliding doors, opening sashes, and the Renson High Rise Acoustically Attenuated Passive Ventilator. Designed specifically for high-rise dwellings, the passive ventilator provides makeup air and natural airflow, acoustic attenuation and IANZ tested weathertightness performance - allowing all stakeholders to breathe easy.

Select a façade contractor for your next reclad project that will engineer a specific façade and glass solution to meet your vision and sustainability goals. We believe a Thermosash façade solution makes your building better, speeds up your enclosure programme, saves you time and reduces your risk.

**Locally engineering, testing, manufacturing and installing façade systems since 1973.**
