

Aecom Building - Auckland

## A SHINING EXAMPLE...

Created by 2,912 folded distressed marine grade stainless steel rainscreen tiles, incorporated into 695 Thermosash unitised panels, in total over 63,997 individual components.

Ensuring the timely manufacture and installation of complex envelope solutions requires planning, coordination and expertise. We approach the building envelope not as pieces and parts, instead we collaborate with the design teams; we engineer, test, locally manufacture, glaze and install curtainwall, windows, shopfronts, skylights, glass and integrated solar shading elements as one seamless integrated unit.

If you want your next project to keep its lustre, let Thermosash manage your building envelope risk – call us, your New Zealand design and manufacture partner Since 1973.
